Model Concerns

What is
Model Concerns

- 把一些共用的函式或是敘述抽取成
  module，讓多個model來引用。

Example

```ruby
module Slugable
  extend ActiveSupport::Concern
  included do
    before_create :generate_slug
  end

  protected

  def generate_slug
    self[:slug] = SecureRandom.hex(8)
  end
end
```

How to Use

```
class Group < ActiveRecord::Base
  include Slugable

end
```
